DEPARTMENT OF ELECTRICAL AND ELECTRONICS ENGINEERING

Date: 10/03/2025

Press Note

One day workshop on "Electrical Safety, Earthing, Preventive Maintenance of Electrical Equipments" In association with IEEE PES student Chapter, Under PowerTech Club on 08th March 2025.

Glimpse of one day workshop on electrical safety by Mr.Prabhuswamy V, Retired Foreman, Dept of EEE, GSSSIETW

The PowerTech Club, in collaboration with the IEEE PES Student Chapter, successfully organized a one-day workshop titled *"Electrical Safety, Earthing, Preventive Maintenance of Electrical Equipments"* at the Department of Electrical and Electronics Engineering.

The event featured a distinguished session led by **Mr. Prabhuswamy V**, Retired Foreman of the EEE Department, whose vast experience and technical insights captivated attendees. He

addressed key topics such as safe handling practices, grounding techniques, and critical maintenance protocols for electrical systems and equipment.

The event saw enthusiastic participation from 4th and 6th semester students alongside faculty members, all of whom gained invaluable insights through interactive discussions and practical demonstrations. In a special highlight of the day, Mr. Prabhuswamy V conducted a campus tour—showcasing the intricacies of power distribution and High Tension (HT) yard maintenance specific to the GSSSIETW infrastructure. This immersive experience bridged theoretical learning with real-time systems, enriching the participants' understanding of campus-scale electrical operations.

The workshop highlighted the importance of safety standards and preventive strategies in electrical engineering—emphasizing risk mitigation and reliability in power systems. The session also served as a platform to inspire budding engineers and deepen their commitment to ethical and safe engineering practices.

The PowerTech Club and IEEE PES Student Chapter continue their commitment to enhancing professional development through expert-led initiatives like these.
